Abstract

1 The abstract paragraph should be indented $\frac{1}{2}$ inch (3 picas) on both the left- and
2 right-hand margins. Use 10 point type, with a vertical spacing (leading) of 11 points.
3 The word **Abstract** must be centered, bold, and in point size 12. Two line spaces
4 precede the abstract. The abstract must be limited to one paragraph.

5 1 Submission of papers to NeurIPS 2026

6 Please read the instructions below carefully and follow them faithfully.

7 1.1 Style

8 Papers to be submitted to NeurIPS 2026 must be prepared according to the instructions presented here.
9 Papers may only be up to **nine** pages long, including figures. **Papers that exceed the page limit will**
10 **not be reviewed (or in any other way considered) for presentation at the conference.** Additional
11 pages *containing acknowledgments, references, checklist, and optional technical appendices* do not
12 count as content pages.

13 The margins in 2026 are the same as those in previous years.

14 Authors are required to use the NeurIPS L^AT_EX style files obtainable at the NeurIPS website as
15 indicated below. Please make sure you use the current files and not previous versions. Tweaking the
16 style files may be grounds for desk rejection.

17 1.2 Retrieval of style files

18 The style files for NeurIPS and other conference information are available on the website at

19 <https://neurips.cc>.

20 The only supported style file for NeurIPS 2026 is `neurips_2026.sty`, rewritten for L^AT_EX 2_ε.
21 **Previous style files for L^AT_EX 2.09, Microsoft Word, and RTF are no longer supported.**

22 The L^AT_EX style file contains three optional arguments:

- 23 • `final`, which creates a camera-ready copy,
- 24 • `preprint`, which creates a preprint for submission to, e.g., arXiv,
- 25 • `nonatbib`, which will not load the `natbib` package for you in case of package clash.

26 **Preprint option** If you wish to post a preprint of your work online, e.g., on arXiv, using the
27 NeurIPS style, please use the `preprint` option. This will create a nonanonymized version of your
28 work with the text “Preprint. Work in progress.” in the footer. This version may be distributed as you

29 see fit, as long as you do not say which conference it was submitted to. Please **do not** use the `final`
 30 option, which should **only** be used for papers accepted to NeurIPS.

31 At submission time, please omit the `final` and `preprint` options. This will anonymize your
 32 submission and add line numbers to aid review. Please do *not* refer to these line numbers in your
 33 paper as they will be removed during generation of camera-ready copies.

34 The file `neurips_2026.tex` may be used as a “shell” for writing your paper. All you have to do is
 35 replace the author, title, abstract, and text of the paper with your own.

36 The formatting instructions contained in these style files are summarized in Sections ??, ??, and ??
 37 below.

38 **2 General formatting instructions**

39 The text must be confined within a rectangle 5.5 inches (33 picas) wide and 9 inches (54 picas) long.
 40 The left margin is 1.5 inch (9 picas). Use 10 point type with a vertical spacing (leading) of 11 points.
 41 Times New Roman is the preferred typeface throughout, and will be selected for you by default.
 42 Paragraphs are separated by $\frac{1}{2}$ line space (5.5 points), with no indentation.

43 The paper title should be 17 point, initial caps/lower case, bold, centered between two horizontal
 44 rules. The top rule should be 4 points thick and the bottom rule should be 1 point thick. Allow $\frac{1}{4}$ inch
 45 space above and below the title to rules. All pages should start at 1 inch (6 picas) from the top of the
 46 page.

47 For the final version, authors’ names are set in boldface, and each name is centered above the
 48 corresponding address. The lead author’s name is to be listed first (left-most), and the co-authors’
 49 names (if different address) are set to follow. If there is only one co-author, list both author and
 50 co-author side by side.

51 Please pay special attention to the instructions in Section ?? regarding figures, tables, acknowledg-
 52 ments, and references.

53 **3 Headings: first level**

54 All headings should be lower case (except for first word and proper nouns), flush left, and bold.
 55 First-level headings should be in 12-point type.

56 **3.1 Headings: second level**

57 Second-level headings should be in 10-point type.

58 **3.1.1 Headings: third level**

59 Third-level headings should be in 10-point type.

60 **Paragraphs** There is also a `\paragraph` command available, which sets the heading in bold, flush
 61 left, and inline with the text, with the heading followed by 1 em of space.

62 **4 Citations, figures, tables, references**

63 These instructions apply to everyone.

64 **4.1 Citations within the text**

65 The `natbib` package will be loaded for you by default. Citations may be author/year or numeric, as
 66 long as you maintain internal consistency. As to the format of the references themselves, any style is
 67 acceptable as long as it is used consistently.

68 The documentation for `natbib` may be found at

Figure 1: Sample figure caption. Explain what the figure shows and add a key take-away message to the caption.

69 `http://mirrors.ctan.org/macros/latex/contrib/natbib/natnotes.pdf`

70 Of note is the command `\citet`, which produces citations appropriate for use in inline text. For
71 example,

72 `\citet{hasselmo}` investigated\dots

73 produces

74 Hasselmo, et al. (1995) investigated...

75 If you wish to load the `natbib` package with options, you may add the following before loading the
76 `neurips_2026` package:

77 `\PassOptionsToPackage{options}{natbib}`

78 If `natbib` clashes with another package you load, you can add the optional argument `nonatbib`
79 when loading the style file:

80 `\usepackage[nonatbib]{neurips_2026}`

81 As submission is double blind, refer to your own published work in the third person. That is, use “In
82 the previous work of Jones et al. [4],” not “In our previous work [4].” If you cite your other papers
83 that are not widely available (e.g., a journal paper under review), use anonymous author names in the
84 citation, e.g., an author of the form “A. Anonymous” and include a copy of the anonymized paper in
85 the supplementary material.

86 4.2 Footnotes

87 Footnotes should be used sparingly. If you do require a footnote, indicate footnotes with a number¹
88 in the text. Place the footnotes at the bottom of the page on which they appear. Precede the footnote
89 with a horizontal rule of 2 inches (12 picas).

90 Note that footnotes are properly typeset *after* punctuation marks.²

91 4.3 Figures

92 All artwork must be neat, clean, and legible. Lines should be dark enough for reproduction purposes.
93 The figure number and caption always appear after the figure. Place one line space before the figure
94 caption and one line space after the figure. The figure caption should be lower case (except for the
95 first word and proper nouns); figures are numbered consecutively.

96 You may use color figures. However, it is best for the figure captions and the paper body to be legible
97 if the paper is printed in either black/white or in color.

¹Sample of the first footnote.

²As in this example.

Table 1: Sample table caption. Explain what the table shows and add a key take-away message to the caption.

Part		
Name	Description	Size (μm)
Dendrite	Input terminal	≈ 100
Axon	Output terminal	≈ 10
Soma	Cell body	up to 10^6

98 4.4 Tables

99 All tables must be centered, neat, clean, and legible. The table number and title always appear before
100 the table. See Table ??.

101 Place one line space before the table title, one line space after the table title, and one line space after
102 the table. The table title must be lower case (except for the first word and proper nouns); tables are
103 numbered consecutively.

104 Note that publication-quality tables *do not contain vertical rules*. We strongly suggest the use of the
105 booktabs package, which allows for typesetting high-quality, professional tables:

106 <https://www.ctan.org/pkg/booktabs>

107 This package was used to typeset Table ??.

108 4.5 Math

109 Note that display math in bare TeX commands will not create correct line numbers for sub-
110 mission. Please use LaTeX (or AMSTeX) commands for unnumbered display math. (You
111 really shouldn't be using \$\$ anyway; see <https://tex.stackexchange.com/questions/503/why-is-preferable-to> and <https://tex.stackexchange.com/questions/40492/what-are-the-differences-between-align-equation-and-displaymath> for more infor-
112 mation.)
113
114

115 4.6 Final instructions

116 Do not change any aspects of the formatting parameters in the style files. In particular, do not modify
117 the width or length of the rectangle the text should fit into, and do not change font sizes. Please note
118 that pages should be numbered.

119 5 Preparing PDF files

120 Please prepare submission files with paper size "US Letter," and not, for example, "A4."

121 Fonts were the main cause of problems in the past years. Your PDF file must only contain Type 1 or
122 Embedded TrueType fonts. Here are a few instructions to achieve this.

- 123 • You should directly generate PDF files using `pdflatex`.
- 124 • You can check which fonts a PDF files uses. In Acrobat Reader, select the menu
125 Files>Document Properties>Fonts and select Show All Fonts. You can also use the program
126 `pdf fonts` which comes with `xpdf` and is available out-of-the-box on most Linux machines.
- 127 • `xfig` "patterned" shapes are implemented with bitmap fonts. Use "solid" shapes instead.
- 128 • The `\bbold` package almost always uses bitmap fonts. You should use the equivalent AMS
129 Fonts:

130 `\usepackage{amsfonts}`

131 followed by, e.g., `\mathbb{R}`, `\mathbb{N}`, or `\mathbb{C}` for $\mathbb{R}$, $\mathbb{N}$ or $\mathbb{C}$. You can also
132 use the following workaround for reals, natural and complex:

```

133 \newcommand{\RR}{\mathbb{R}} %real numbers
134 \newcommand{\Nat}{\mathbb{N}} %natural numbers
135 \newcommand{\CC}{\mathbb{C}} %complex numbers

```

136 Note that `amsfonts` is automatically loaded by the `amssymb` package.

137 If your file contains type 3 fonts or non embedded TrueType fonts, we will ask you to fix it.

138 5.1 Margins in L^AT_EX

139 Most of the margin problems come from figures positioned by hand using `\special` or other
140 commands. We suggest using the command `\includegraphics` from the `graphicx` package.
141 Always specify the figure width as a multiple of the line width as in the example below:

```

142 \usepackage[pdftex]{graphicx} ...
143 \includegraphics[width=0.8\linewidth]{myfile.pdf}

```

144 See Section 4.4 in the graphics bundle documentation ([http://mirrors.ctan.org/macros/](http://mirrors.ctan.org/macros/latex/required/graphics/grfguide.pdf)
145 [latex/required/graphics/grfguide.pdf](http://mirrors.ctan.org/macros/latex/required/graphics/grfguide.pdf))

146 A number of width problems arise when L^AT_EX cannot properly hyphenate a line. Please give LaTeX
147 hyphenation hints using the `\-` command when necessary.

148 References

149 References follow the acknowledgments in the camera-ready paper. Use unnumbered first-level
150 heading for the references. Any choice of citation style is acceptable as long as you are consistent. It
151 is permissible to reduce the font size to `small` (9 point) when listing the references. Note that the
152 Reference section does not count towards the page limit.

160 A Technical appendices and supplementary material

161 Technical appendices with additional results, figures, graphs, and proofs may be submitted with the
162 paper submission before the full submission deadline (see above). You can upload a ZIP file for
163 videos or code, but do not upload a separate PDF file for the appendix. There is no page limit for the
164 technical appendices.

165 Note: Think of the appendix as “optional reading” for reviewers. The paper must be able to stand
166 alone without the appendix; for example, adding critical experiments that support the main claims to
167 an appendix is inappropriate.
